**FENCING DIRECT**          You're Fencing Project Check List

☐ Determine the goals for installing your fence.

Are you looking for security, privacy, installation for a swimming pool or to contain your pets?

☐ Establish a budget for your project

Fencing can be more costly than you might think, it will; however increase the value of your property and home.

☐ Check with your HOA, city or town covenants on any restrictions on the type of fence you many have.

Many Home Owners Associations, Cities or Towns have height or style restrictions on what you can install on you property. It is best to find out before you get too far on your project.

☐ Locate your property pins or markers around the perimeter of you home

If you are installing the fence on your property line you, need to use your plat or locate your property pins to make sure you do not install your fence on the neighboring land. A survey may need to be done.

☐ Measure and draw out the area around your home on where you want to install your fence.

Use a tape measure or wheel to determine the footage you will be enclosing. Take note of any obstacles such as trees of rocks that may need to be removed before installation.

☐ Determine how many and what width gates you will need on your project.

Before determining your gate requirements take measurements on the size of lawnmowers or other vehicles that may need to enter the enclosure.

☐ Draw out and price the fencing that meets your needs and compare it your financial budget for the project.

Use our Fence Builder to draw out and price hundreds of style heights and colors of fencing that meets your needs

☐ Determine if you are comfortable installing the fence yourself or hiring a local handyman or landscape contractor to install it for you.

Most of our fencing is easy to install with a friend or neighbor. Alternatively you may find a local handyman or landscaper can install the material for you at a reasonable price.
